PROJECTS

- **Project 1 Title:** RFID Card Based Water Plant System
A RFID Card Based Water Plant System is a smart and automated solution designed to manage the distribution of water using RFID technology. It's commonly used in rural areas, public water dispensing stations, or apartment complexes to ensure controlled, fair, and cashless access to clean drinking water.
- **Project 2 Title:** Listening Bug Using Ic 741
This project is a small sound amplifier made using the **IC 741** (an op-amp). It picks up tiny sounds using a microphone and makes them louder so you can hear them through a speaker or earphones. The microphone captures sound, and the **IC 741** increases (amplifies) the sound signal. This louder signal is then sent to a speaker or earphones. It's like a basic spy mic or sound booster used to hear sounds from a distance.
